CONTEMPORARY ART PRACTICE

Our premise is to enable the student to enter the field of art practice through an interdisciplinary approach. By exploring old and new media forms like drawing, painting, textiles, digital computing, coding, film, sound, performance, along with an exposure to science, technology, craft and community practices, this program provides a vibrant context that encourages critical thinking through making, dialogue, collaboration and community interaction.

ELIGIBILITY

Published on the admissions page of the Srishti Manipal website.

MEDIUM OF INSTRUCTION

English; all our transactions and transcripts will be in English.

DURATION

8 semesters (4 years); must be completed within 6 years from the start of the course of study.

DESCRIPTION OF CURRICULUM COMPONENTS

FOUNDATION STUDIES introduces students to basic principles and tools of Art and Design through contextual studies and hands-on learning and is common to all courses.

DISCIPLINARY STUDIOS are learning spaces where students develop core disciplinary skills and knowledge, while navigating in a trans-disciplinary environment.

WORKSHOPS provide intense learning experiences in making and doing, across the different disciplines.

GENERAL STUDIES are designed to develop and broaden one's world view and sharpen critical thinking and communication skills.

ELECTIVES allow students to expand their skills, develop interests and provide opportunities for travel and exchange.

ABILITY & SKILL ENHANCEMENT COURSES (AEC), (SEC) include learning units that enable enrichment of knowledge specific to a discipline, or are skill-based and provide hands-on-training and competencies.

CHARENTTES are end of semester challenges that allow students to apply their learning from the studios and workshops to participate in brief-driven, quick-fire design assignments.

INTERIM is an open elective that encourages exploration through an open-ended framework for learning by engaging with artistic practices. Contemporary artists are invited from all over the world to lead place-based projects.

INTERNSHIP in an art or design studio/ organization / industry provides students an opportunity to refine and apply their learning in a professional environment.

TERM PAPER allows the integration of theory and reflection with practice or artefact creation.

PROJECT involves the application, synthesis and demonstration of capabilities acquired, and is a qualifier to the thesis.

THESIS PROJECT in the final year is the synthesis and demonstration of capabilities acquired. The first semester includes a qualifying research project; the second a Final Thesis project which is interdisciplinary, within a current context.

CO-CURRICULAR ACTIVITIES provide opportunities for students to stay healthy as well as broaden their talents in various activities.

MAJOR AND MINOR

Navigation for students under the CBCS is provided through the choice of an academic major and minors. In addition to this, there is a choice of open electives, through General Studies and Interim.

An Academic Major typically consists of a Core Curriculum, with prescribed units of study. The Core Curriculum may comprise of the disciplinary studios listed below, which are indicative and not exhaustive. The choice of learning units taken as an academic major may also include similar disciplinary studios chosen from those listed on the prospectus of other specialised courses.

An Academic Minor is a student's second disciplinary choice and has its own prescribed units of study. A minor is chosen from learning units offered as prescribed as chosen from an interdisciplinary studies cluster other than the one in which their course is located.
